Extension 1: P4Phones

Mobile Phones

Overview: You own a shop called **P4Phones** which sells mobile phones. You need to create a suitable database to keep a record of the different types of mobile phones sold in your shop.

1. You first need to create a table including appropriate field types (**Model, Brand, Price, Camera, Operating System, Memory etc.**)

2. You then need to add at least **10 different records (mobile phones)** to the database.

3. Create a simple report (Landscape) showing all the data.

Task2
Create a database for the staff at **P4Phones and add 10 records.**

Task3:
Create a database for the customers at **P4Phones and add 10 records.**
