# Lesson Overview

## Unit Objectives

Understanding the positive design features of a website.

Understand how to create appropriate content (including rollover & animated images) in suitable software.

Understand how to export and import files into suitable software.

Understand how to create and apply simple CSS text and list styles.

Understand how to create internal and external hyperlinks.

## Outcomes

Time

Outcomes		Time
<b>Task 1</b>	Create Rollover buttons	
<b>Task 2</b>	Animated Content	
<b>Task 3</b>	Content into Tables	

# Refer to the Template Sizes

## Template Size – You can change the Colours

**Animated Content**

Height: 150px;  
Width: 850px

**Rollover Buttons**

Height: 100px;  
Width: 170px;

# Task 1: Create Rollover Buttons

## Paint.net

1. Click on **File >> New** and set the **Canvas Size** (Refer to chosen template)
2. Refer to your design and create your first button. Include the **button name** and a **suitable image/Colour**. Use **Layers** to create different parts of the button.
3. Save the button as **paint.net file**.
4. Save the button as a **Jpeg File**.
5. Name the button **Home1**
6. Open the **paint.net file**
7. Edit the button and **apply the rollover effect**.
8. Save the button as a **Jpeg File**
9. Name the button **Home2**

# Task 1: Create Rollover Buttons

## Paint.net

You should have a **paint.net file** for **each button**. This file will **maintain the layers** and can be **edited**.

**2 JPEG Files** should be exported for **each rollover state – Up/Over**.

Name	Date	Type	Size
home	18/02/2019 17:29	paint.net Image	105 KB
home1	18/02/2019 17:30	JPEG image	11 KB
home2	18/02/2019 17:36	JPEG image	11 KB

**Paint.net File**

**Up**

**Over**

**JPEG Files**

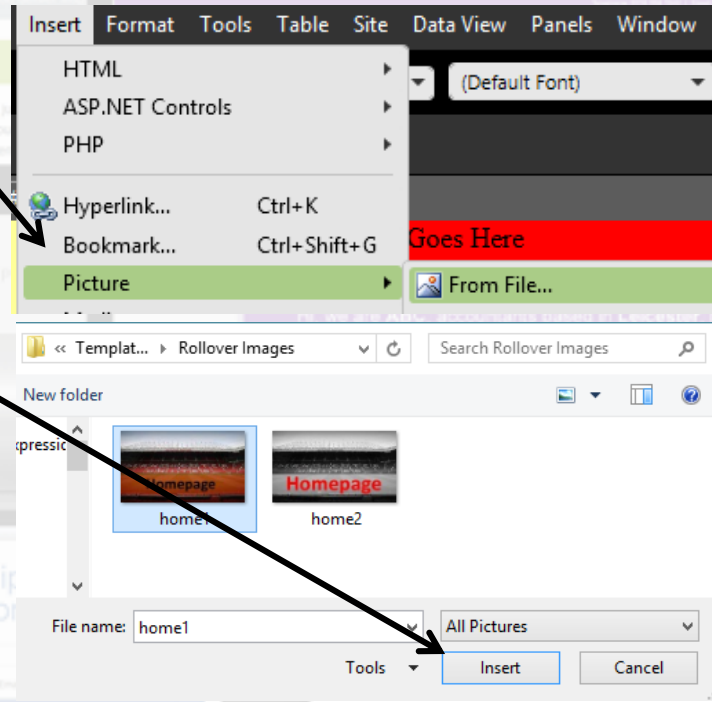

# Task 2: Import Rollover Buttons

## Web Expression

1. Using the **code view** click in-between **R1**< tags for the 1<sup>st</sup> rollover image.
2. Click on **Insert** >> **Picture** >> **From File**
3. Browse and Select the **UP rollover** button
4. Click on Insert.

Make sure the button rollovers are **saved** in the **jpeg** format

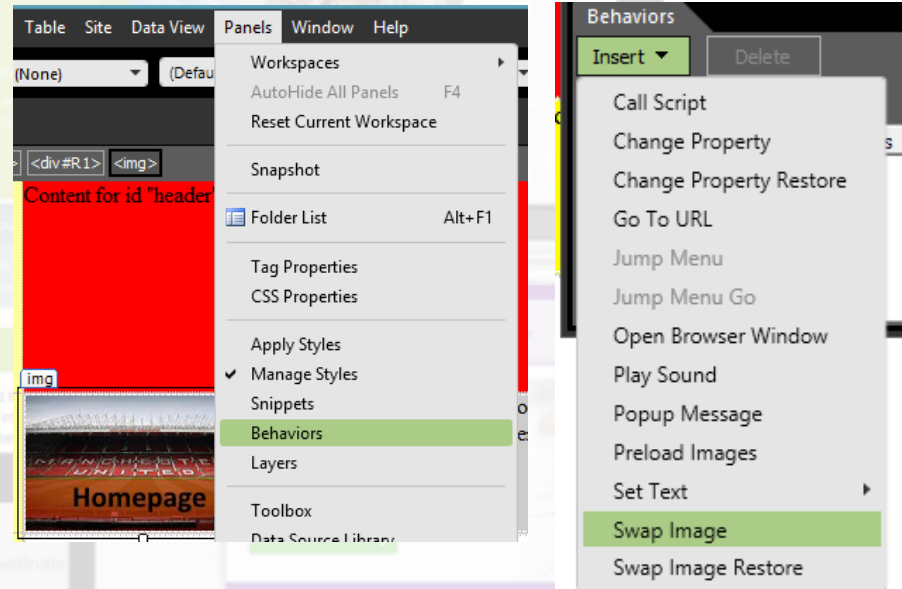

```
div#R1  
Content for id "R1  
Here  
<div id="R1"></div>
```

# Task 2: Import Rollover Buttons

## Web Expression

1. Select the Up Rollover image.
2. Click on **Panels** >> **Behaviours**
3. On the **Behaviours Panels** click on **Insert** >> **Swap Image**
4. Browse and **select the over rollover button**.
5. **Click on Restore on mouseout event.**
6. Click on OK

# Task 2: Creating Animated GIF

## Paint.net

1. Set the **Canvas Size** (Refer to chosen template)
2. Copy and paste your first image on the canvas and save as **animation1** in the **JPEG format**.
3. Delete the picture and copy and paste your second image on the canvas and save as **animation2** in the **JPEG format**.
4. Delete the picture and copy and paste your third image on the canvas and save as **animation3** in the **JPEG format**.

# Task 2: Creating Animated GIF

1 <https://ezgif.com/maker>

## Paint.net

1. Click on the above link to go to the **gifmaker** website.
2. Click on **Choose Files** and upload your images.
3. Click on **Upload and make a GIF**.
4. Click on **crossfade frames** to apply fade effects.
5. Click on **Make a GIF**.
6. Click on **Save icon** to download the animated GIF.

## Animated GIF Maker

### Upload images

2

Select images:  
Choose Files No file chosen

GIF/JPG/PNG/A No file chosen other images, up to 2000 files.  
Max file size 6MB each or 100MB in total.  
You can select multiple files or upload .zip archive with images.

3

Upload and make a GIF!

 animation3  
 animation2  
 animation1

4

### Effects:

crossfade frames

Fader delay: 6

Frame count: 10 (2-20)

don't fade last to first frame

5

don't stack frames (Remove the frame when it's time to display next one, use for images with transparent background)

Make a GIF!

File size: 2.79MiB, width: 850px, height: 150px, frames: 30, type: gif convert

We advise you to optimize the GIF to reduce file size!

6

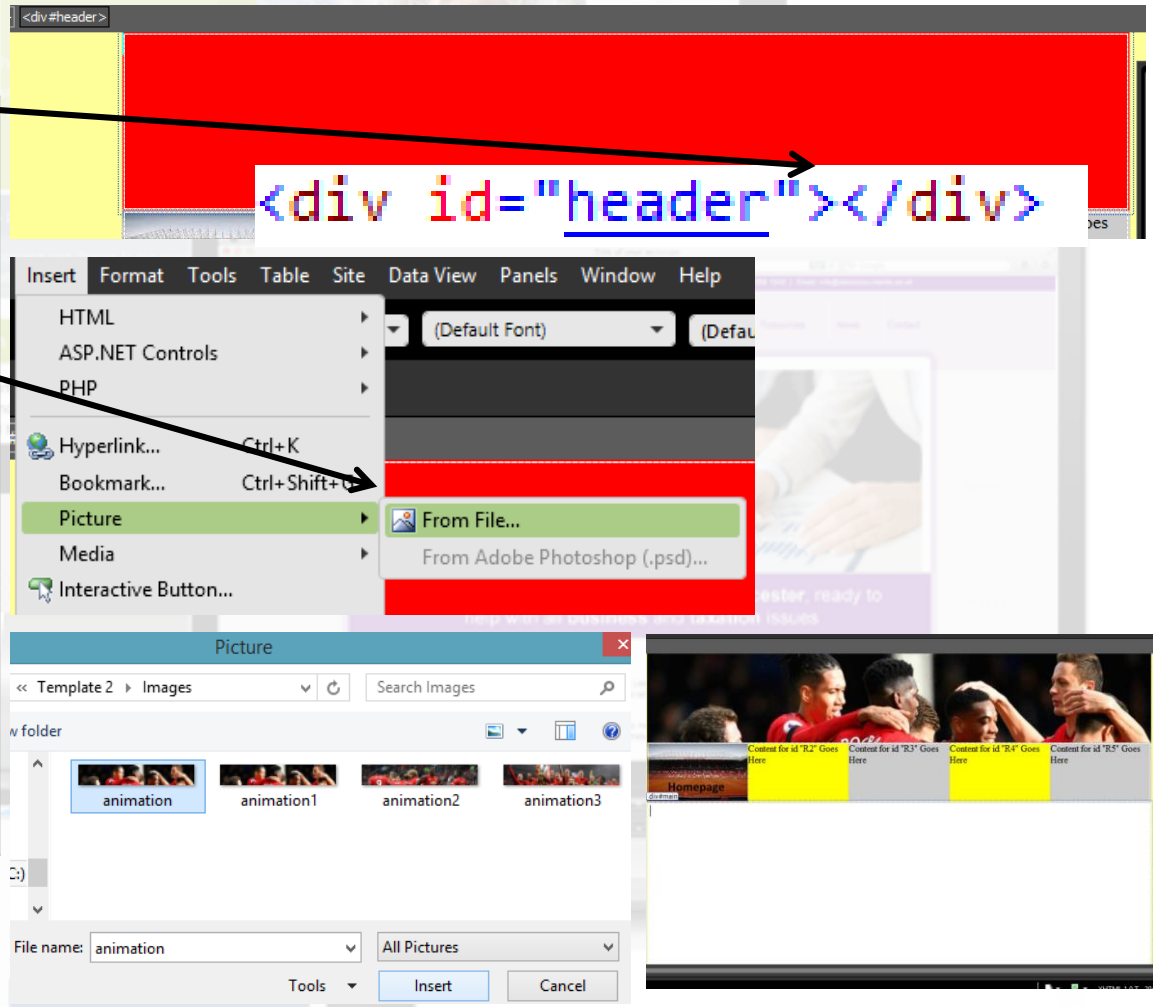

save

# Task 2: Importing Animated GIF

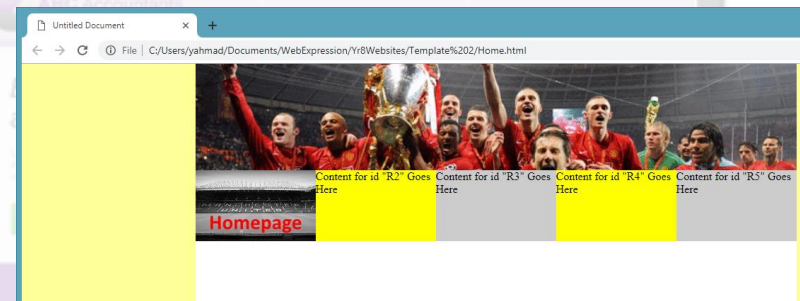

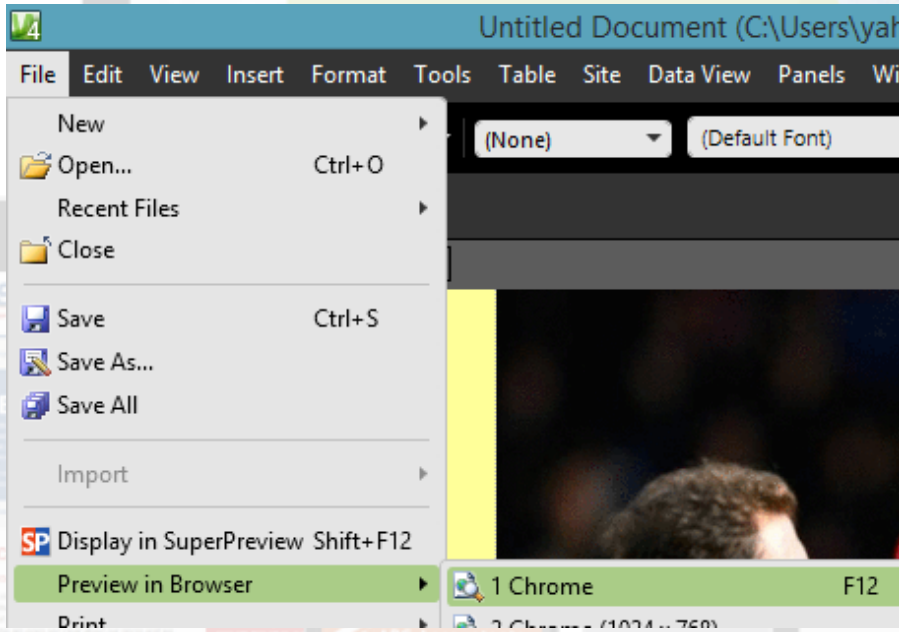

## Paint.net

1. Using the **code view** click in-between **>< tags** for the **header tag** (Delete any text).
2. Click on **Insert >> Picture >> From File**
3. Select the **animated Gif**.
4. You can **add alternative text** if the image does not show.

Preview the animated gif in the browser view.

# Preview in Browser

To preview the webpage in the browser click on **File >> Preview in Browser >> Chrome**
